Reditr Crack + Torrent (Activation Code) Download [32|64bit]

Reditr Cracked Accounts is a Windows application that facilitates a desktop client for the Reddit website. It proposes an approachable method for keeping up to date with the latest posts and comments on your favorite subreddits, where you're a registered or anonymous user. It supports multiple accounts and desktop notifications. Simple setup and clear-cut interface The installation procedure is a fast task that shouldn't give you any trouble. As far as the interface is concerned, Reditr Download With Full Crack adopts a large window with a neatly organized structure which reminds us of TweetDeck, where you can view each subreddit as a column, easily switch to a different subreddit, and manage multiple Reddit accounts. Customize the column view with subreddits The default view is the frontpage, evidently, and the default subreddits are the ones shown on the Reddit domain, including Funny, Pics, Aww, WorldNews, lamA, and AskReddit. The tool lets you remove any of them from the column view, edit their title, or manage them. It's possible to add as many columns as you want with any subreddit, the front pages, all subreddits, a search function, the user page, random subreddit, or even domain. Subreddits can be sorted by hot, top, new, or controversial. Look up users, view history, and configure settings Furthermore, you can look up any user's posts, set up your profile, refresh the current view, check out history, enable infinite column scroll, the NSFW ribbon and the automatic loading of all comments, as well as disable the flagging of new comments, sliding to comments when clicking them, live private messages, desktop notifications, hovering over previews, and others. Personalize the interface, apply filters, and remap hotkeys When it comes to the UI theme, you can switch from light to dark mode, edit the default column and scrollbar width, increase or decrease the font size, turn off visual animations, disable background stretching, as well as upload a custom image to apply as the background.

Furthermore, it's possible to set up filters with phrases for posts to avoid, domains to block posts from, and subreddits to ban. Filtering is case insensitive. You can also disable account syncing, change your Reddit account information, disable macros or customize the currently set hotkeys (e.g. open search, close active item, open notifications), or import RES tags.

Evaluation and conclusion We haven't come across any stability issues in our tests, thanks to

Reditr

Reddititr is a small desktop client which enables you to browse reddit from the toolbar. Skin: Код: Сайт: Платформа: Windows Продолжительность: 1 день Язык: Русский Мои настройки Ссылка: Оценить 12 оценивали Качество: Bugs: Lacks support for downloading the most popular posts. Posts from comments don't appear under the "page" header. Subscribing to multiple reddit accounts does not work. Замечания: Searchable messages feature needs to be improved. Продолжительность: 1 день Язык: Русский Мои настройки Ссылка: Качество: Цензура: Yes Графика: Yes Форматирование: Yes Перевод на русский язык: Yes Управление контентом: Yes Выбор графика: Yes Браузер на редактирование: b7e8fdf5c8
